- > Automated documentation generator powered by AI that keeps your project docs fresh and comprehensive

Description

Athena is an intelligent documentation tool that automatically scans your codebase, analyzes its structure, and generates comprehensive documentation using Claude AI. It understands your project's architecture, features, and functionality to create high-quality README files, changelogs, and architectural diagrams without manual effort.

Built for modern TypeScript projects, Athena integrates seamlessly into your development workflow. It analyzes source code, captures screenshots, tracks git history, and produces

documentation that stays in sync with your codebase. Whether you're starting a new project or maintaining an established one, Athena ensures your documentation is always accurate and up-to-date.

The tool goes beyond simple code documentation by generating visual aids like Mermaid diagrams, embedding screenshots, and creating interactive documentation that helps developers quickly understand and contribute to your project.

Features

- **Automated Code Analysis** — Scans TypeScript projects to extract functions, classes, and dependencies
- **AI-Powered Content Generation** — Uses Claude AI to generate natural, comprehensive documentation
- **Screenshot Integration** — Captures and embeds application screenshots using Playwright
- **Diagram Generation** — Creates architectural diagrams with Mermaid
- **Changelog Automation** — Parses git history and tags to generate changelogs
- **Freshness Tracking** — Monitors documentation staleness and recommends updates
- **Configuration Management** — Flexible YAML-based project configuration
- **Cross-Reference Building** — Links related documentation sections automatically
- **Diff Analysis** — Shows documentation changes before committing updates

Quick Start

Installation

```
npm install -g athena
```

Configure

Create an `athena.yml` file in your project root:

```
project:
  name: my-project
  framework: react
  language: typescript

ai:

  provider: claude
  model: claude-3-5-sonnet-20241022
```

```
docs:
```

```
  output: ./docs  
  readme: true  
  changelog: true
```

Run

```
# Scan and generate documentation  
athena generate
```

Check documentation freshness

```
athena check
```

Generate with screenshots

```
athena generate --screenshots
```

Usage

Basic Documentation Generation

```
# Generate all documentation  
athena generate
```

Generate specific docs

```
athena generate --readme-only
```

```
athena generate --changelog-only
```

Screenshot Capture

```
# Capture screenshots with dev server  
athena screenshots --dev-command "npm start" --port 3000
```

Use existing server

```
athena screenshots --url http://localhost:3000
```

Configuration

```
# Check if project has config  
athena config check
```

Show current configuration

```
athena config show
```

Freshness Checking

```
# Check documentation freshness  
athena check
```

Verbose output with details

```
athena check --verbose
```

Tech Stack

- **Language:** TypeScript
- **AI Provider:** Anthropic Claude API (`@anthropic-ai/sdk`)
- **CLI Framework:** Commander.js
- **Screenshot Tool:** Playwright
- **Diagram Rendering:** Mermaid CLI
- **File Globbing:** glob
- **Diff Generation:** diff

Configuration

Environment Variables

```
# Required for AI generation
ANTHROPIC_API_KEY=your_api_key_here
```

Configuration File (athena.yml)

```
project:
  name: string          # Project name
  framework: string     # Framework (react, vue, next, etc.)
  language: string      # Primary language

ai:

  provider: string      # AI provider (claude)
  model: string         # Model name
  max_tokens: number    # Optional: token limit

docs:

  output: string        # Documentation output directory
  readme: boolean       # Generate README.md
  changelog: boolean    # Generate CHANGELOG.md
  diagrams: boolean     # Generate architecture diagrams

screenshots:

  enabled: boolean      # Enable screenshot capture
  paths: string[]       # Routes to capture
```

Contributing

Contributions are welcome! Please see [CONTRIBUTING.md](#) for guidelines on how to contribute to Athena.
